PROFILE SUMMARY

Motivated Software Engineering Intern candidate with proficiency in Python and Java, along with hands-on experience in full-stack development and building data-driven applications. Experienced in developing web applications, working with APIs, databases, and deploying projects. Familiar with basic machine learning concepts and passionate about writing clean, scalable code while contributing to modern software and AI-driven solutions.

EDUCATION

Poornima College – B.Tech Information Technology (2023–2027) – CGPA: 9.3

St. Paul's School – ICSE (2023) – 88%

St. Paul's School – ICSE (2021) – 90%

TECHNICAL SKILLS

Programming: Python, Java, C++ (basic), JavaScript(basic)

Data & AI Fundamentals: Pandas, NumPy, Data Analytics, Basic Machine Learning

Web Development: React.js, Node.js, Express.js, HTML, CSS

Databases: MongoDB, Firebase

Tools: Git, GitHub, Streamlit, Matplotlib

EXPERIENCE

Data Science and Analyst Intern – DMV CoreTech Solutions (Dec 2025 – Mar 2026)

Worked on data cleaning, preprocessing, and exploratory data analysis to extract meaningful insights from datasets, while also developing machine learning models and dashboards to support business decision-making processes.

Full Stack Developer Intern – Upflairs Pvt. Ltd. (Jun 2024 – Jul 2024)

Developed and optimized web applications using MERN stack, improving user interface responsiveness and backend efficiency while collaborating on integration and deployment tasks.

PROJECTS

Customer Churn Prediction System (Live)

Developed a Logistic Regression model to predict customer churn using telecom data, performed preprocessing and feature engineering, built an interactive Streamlit dashboard for real-time predictions.

Student Performance Prediction System (Live)

Built a predictive model using Linear Regression to estimate student performance based on study patterns, carried out preprocessing and evaluated performance, and deployed an interactive interface with visualization capabilities.

Market Trend Dashboard (Live)

Designed and developed a data visualization dashboard to analyze market trends using interactive charts, focusing on data storytelling, user-friendly design, and clear presentation of insights for better decision-making.

ACHIEVEMENTS

- Finalist – Smart India Hackathon 2024
- Top 20 – Hackstorm (Devfolio)
- Top 5 – Yi Ideathon 2025
